Onion - Allium cepa

Sow onion seed indoors between February and April in a seed tray at a depth of 1cm. Place in a propagator or seal container inside a plastic bag at a temperature of 10-15°C until after germination which usually takes 10-14 days. Once germinated, grow onions on in cool conditions until all risk of frost has passed and they are large enough to plant outdoors at a distance of 10cm (4") apart. Cover with a protective netting or fleece to prevent attack from birds and insects.

Water the plants thoroughly after planting.
